EDUCATION

University of Maryland, College Park, MD **2021 – Present**

Ph.D. in Urban and Regional Planning and Design

- GPA: 3.83/4.0; Dean's Fellowship; Ann G. Wylie Dissertation Fellowship
- Major: Transportation Planning and Policy; Minor: Urban Data Science
- Dissertation: "Reshaping Metropolitan Spatial Economic Structure in the Telework Era"; Advisor: Casey Dawkins

Ulsan National Institute of Science and Technology (UNIST), Ulsan, South Korea **2018 – 2020**

M.Sc. in Urban Infrastructure Engineering

- GPA: 4.08/4.3; Full Scholarship for two years
- Thesis: "Impact of Regional Transportation Investments on Housing Values in Central Florida"; Advisor: Gi-Hyong Cho

Ulsan National Institute of Science and Technology (UNIST), Ulsan, South Korea **2014 – 2018**

B.Sc. in Urban Infrastructure Engineering & Business Management (Minor)

- GPA: 3.86/4.3; Full Scholarship for four years; Graduated with Honors: *Magna Cum Laude*

PROFESSIONAL EXPERIENCE

Data Science for Social Good Fellowship, Johns Hopkins University, Baltimore, MD **Summer 2026**

Summer Fellow

- Selected for a competitive 12-week fellowship pairing data scientists with city governments and nonprofit partners on applied AI, machine learning, and analytics projects with public-sector impact.
- Collaborating with GovEx and a host city agency to deliver an end-to-end data science project spanning data discovery, cleaning, modeling, and stakeholder-facing visualization, in line with public-sector data governance and ethics standards.
- Participating in cohort training on equitable and reproducible data science practice, with mentorship from academic and industry data scientists.

Lab @ DDOT (District Department of Transportation), Washington, DC **Summer 2025**

Research Assistant

- Developed a Python-based machine learning framework to predict citywide ridership using limited and uneven data, and to identify areas with unmet demand.
- Supported data science and bike planning teams at the Office of the City Administrator and DDOT to address agency and community priorities.

National Center for Smart Growth Research, University of Maryland **Jan 2022 – May 2025**

Research Assistant

2022–2024 Annual Maryland Commuter Survey

- Led a three-year MDOT-funded study, overseeing survey design, data analysis, and technical reporting to support statewide planning for transportation infrastructure.
- Advised state officials on key findings, including that hybrid workers comprise one-third of the workforce and have the longest commutes, trip times have increased, and few auto commuters can switch to transit without substantially longer travel.

Evaluating the Maryland Commuter Tax Credit Program **Jan 2024 – Aug 2024**

- Found that under \$160K of the \$1M annual allocation was claimed despite legislative support.
- Conducted stakeholder interviews and analyzed program data to identify key barriers, including employer administrative burden, unclear ROI, and limited transit coverage.
- Recommended individual filing, expanded coverage eligibility, and streamlined outreach to better serve low-income and non-traditional workers.

Multi-Criteria Decision-Making Framework for Public Microtransit **Jan 2022 – Aug 2023**

- Developed service criteria using over 100 case studies and a Spatial Propensity Index to identify optimal service zones.
- Presented findings to Prince George's County and co-authored a peer-reviewed study in *Transportation Research Record*.

District Department of Transportation (DDOT), Washington, DC **Summer 2023**

Transit Operations Data Analyst Intern

- Developed a real-time Tableau visualization tool for DC Circulator operations, supported by a Python and SQL ETL pipeline.
- Standardized data entry processes to improve the consistency of operational reporting for RATP Dev transit operator personnel.

TEACHING EXPERIENCE

URSP601 Quantitative Research Methods (Graduate Level), University of Maryland **Fall 2024, Fall 2025**
Course Instructor

- Served as sole instructor, integrating research design, quantitative methods, and applied statistics for urban policy.
- Developed curriculum in R and reproducible research, and mentored students on projects using large administrative datasets.
- Received strong evaluations for course organization, practical relevance, and support for students at all skill levels.

GRANTS AND AWARDS

- | | |
|--|-------------|
| • Data Science for Social Good Fellowship: \$14,500, Johns Hopkins University | Summer 2026 |
| • Ann G. Wylie Dissertation Fellowship: \$15,000, University of Maryland | Spring 2026 |
| • Dean's Fellowship: \$20,000, University of Maryland | 2021–2022 |
| • Best Conference Paper Award: Korea Planners Association | Fall 2018 |

TECHNICAL TOOLKIT

Python, R; GIS (ArcGIS Pro, QGIS, PostGIS); Spatial R & Python (GeoPandas, OSMnx, sf, tidycensus); Visualization (Tableau, Shiny); SQL (PostgreSQL, BigQuery); Cloud & Workflow (Google Cloud, Docker, Git); Reporting & Survey (L^AT_EX, Qualtrics)
